# Definition of Metaverse

3

## METAVERSE

Combination of “**meta**” as transcending and “**universe**” as a parallel or virtual environment

A world where humans as avatars interact with each other and with software agents, in a three-dimensional space that reflects the real world

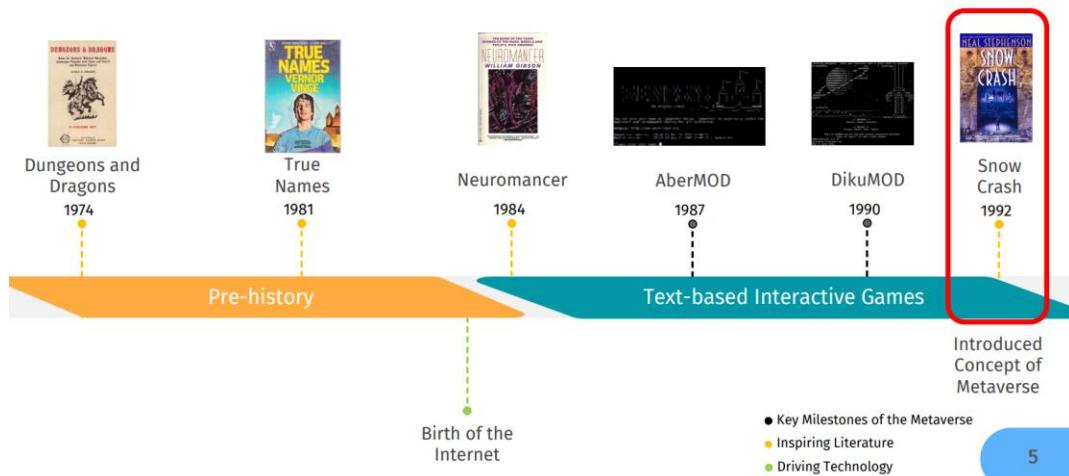

Metaverse is widely used in the sense of a virtual world based on daily life where the real and the unreal coexist

Narrow definition: metaverse is the new virtual space of “Meta” (of Zuckerberg)

11

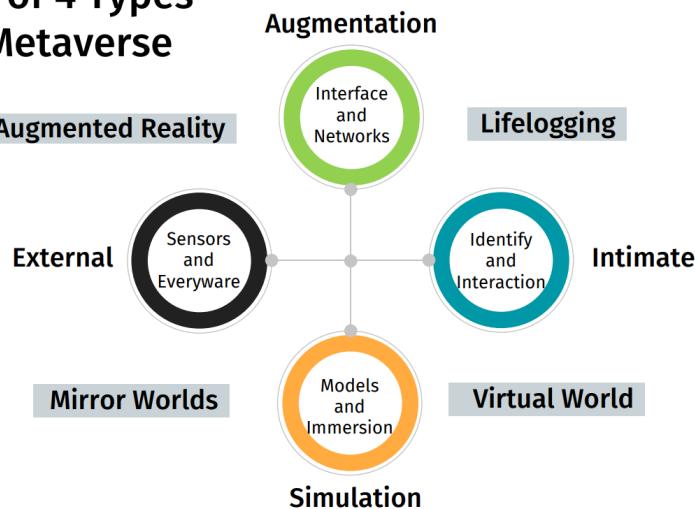

## Metaverse Taxonomy and Tools in Education

12

## Diagram of 4 Types of the Metaverse

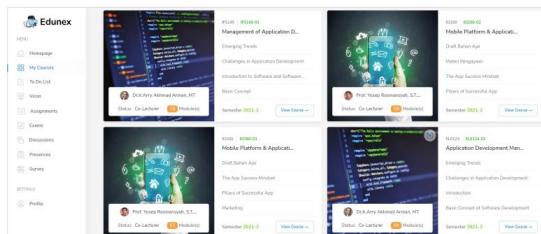

13

## Lifelogging

Technology to capture, store, and share everyday experiences and information about objects and people

### Educational Implications:

Reflect on learning and improve it based on data analytics (e.g., dashboard)

Teachers promote learning in a customized direction based on students' learning log data, provide appropriate support and prevent dropouts

14

## Virtual Worlds

A virtual world built with digital data

**ROBLOX**

**SECOND LIFE**

### Educational Implications:

User can have immersive experiences

Improve strategic and comprehensive thinking skills, problem-solving skills, and learn skills necessary for the real world

15

## Mirror Worlds

Reflects the real world as it is, but integrates and provides external environment information

### Educational Implications:

Overcoming the spatial and physical limitations of teaching and learning, learning takes place in the metaverse of the mirror world

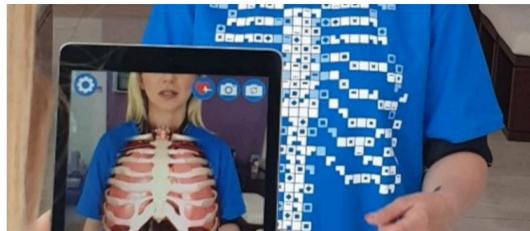

Conduct online real-time classes through online video conferencing tools and collaboration tools

16

## Augmented Reality

Building a smart environment by utilizing location-based technologies and networks

### Educational Implications:

Learn invisible parts visually and 3-dimensionally through virtual environment

In-depth understanding of content that is difficult to observe or explain in text

Interactive experiences

17

## Advantages & Disadvantages

18

## Advantages of Metaverse

### Simulation-based learning

- Potential for educational radical innovation, laboratory simulations (e.g., safety training), procedural skills development (e.g., surgery), and STEM education
- Provide immersive learning experience
- Enhance collaborative learning
- Interactive and dynamic learning environment
- Improve students' learning motivation and learning quality

### Others

- Provide a higher degree of freedom to create and share
- Expected to be freedom from constraints of time and space
- Provide equal opportunities to those who suffer due physical problems and environments

19

## Disadvantages of Metaverse #1

### Pedagogical Issues

- Lack of teacher competencies
- Lack of pedagogical structure
- Inflexibility of application
- Cost a lot of time, design, and practice, which limits its development

### Technical Issues

- Network issues
- Poor app design

### Health Issues

- Motion sickness
- Nausea
- Dizziness
- Head & neck fatigue

20

## Disadvantages of Metaverse #2

### Privacy and Security Risks

- Identity theft
- Data hacks
- Breaches

### Morality and Ethics

- Social isolation
- Cyber-bullying

## Patents by Rosmansyah et al.: 3DMUVLE for Learning & Assessment

METODE UNTUK PEMBELAJARAN DAN PELATIHAN MENGGUNAKAN LINGKUNGAN VIRTUAL 3 DIMENSI		Jenis Permohonan : PATEN		Jumlah Klaim Total Claim : 6					
<b>Bidang Teknik Invensi</b>									
Invensi ini berhubungan dengan suatu metode untuk pembelajaran dan pelatihan dengan menggunakan lingkungan virtual tiga dimensi (3D). Lebih khusus pada invensi ini									
Jenis Permohonan : PATEN	Jumlah Klaim Total Claim : 5	Jenis Permohonan : PATEN	Jumlah Klaim Total Claim : 6	Jumlah halaman Total page : 8	Jumlah halaman Total page : 8				
Judul Title : METODE UNTUK PENGAJIAN MENGHITUNG MENGGUNAKAN GAMIFIKASI TIGA DIMENSI DAN REALITAS VIRTUAL	Jumlah halaman Total page : 7	Judul Title : METODE UNTUK PENGAJIAN MENGHITUNG MENGGUNAKAN GAMIFIKASI TIGA DIMENSI DAN REALITAS VIRTUAL	Jumlah halaman Total page : 8	Invensi ini berhubungan dengan metode pengajaran menghitung dengan menggunakan bantuan game elektronik. Invensi ini memuatkan suatu metode pengajaran menghitung dengan menggunakan gamifikasi 3D dan VR sehingga pembelajar akan menyukai dan bermain secara berkelanjutan yang pada akhirnya menjadi pandai menghitung. Invensi ini dicirikan dengan tahap membuat objek angka dan lingkungan berupa tampilan 3D, memuatkan teknologi VR dan gamifikasi 3D yang memberikan pengalaman yang menyenangkan dan menyenang, memberikan materi yang lebih sulit untuk pembelajar yang ahli, memberikan materi yang lebih mudah untuk pembelajar yang kurang cakap, meningkatkan tahuhan dan minat pembelajar, memberikan pertanyaan dan poin nyawa dan skor, memberikan hint atau petunjuk berupa contoh soal yang serupa dengan pertanyaan tapi tak sama apabila pembelajar kesulitan dalam menjawab pertanyaan.					
Abstrak Abstract		Abstrak Abstract							
METODE UNTUK UJI KOMPETENSI DAN LOMBA KOMPETENSI MENGGUNAKAN LINGKUNGAN VIRTUAL TIGA DIMENSI									
<b>Bidang Teknik Invensi</b>									
Invensi ini berhubungan dengan suatu metode untuk uji kompetensi atau lomba kompetensi peserta dengan menggunakan lingkungan virtual tiga dimensi (3D) pada perangkat komputer
